A scatter plot showing the relationship between 'RDateTime' (x-axis) and an unlabeled variable (y-axis). The x-axis ranges from 13:00 to 13:06. The y-axis has four tick marks but no numerical labels. The data points show a sharp increase starting around 13:01:30, reaching a peak near 13:06:30. Two vertical lines are present at approximately 13:00:50 and 13:06:10.

The scatter plot displays CO2 concentration in ppm on the y-axis (ranging from 387 to 396) against RDateTime on the x-axis (ranging from 13:00 to 13:06). Two vertical lines are drawn at approximately 13:01:15 and 13:05:55. The data points show a significant increase in CO2 concentration starting around 13:01:15, peaking near 396 ppm, and then a gradual decrease towards 13:05:55, followed by a sharp drop and a slight recovery.
